Field of the problem we are solving

Education

College students juggle many problems in different environments. And for most evening students, this is managing their academic and work-life which could be one of the causes of a bad experience during their time at campus.

When we joined the university (as evening students), we found it hard to access most of the services, even the little details like the timetable, accessing MUELE and Makerere's webmail registration. and this sparked an interest to solve this for the next to come and continuing students.

What societal or annoying problems are we solving?

- We are making education more accessible and fun even to busy students. through a Q &A forum and other software features.
- Connecting students of the same interests "learning Together".
- Settling in new students faster.

Our Solution

We thought of a mobile App that can help students organize their assignments, set deadlines, and help them keep track of their grades and a continuously updated timetables and notes

Group J: A Mobile App for students activities in one place
